RE: Extension for LMO M040013

Dear April,

Thank you for your patience regarding our delay in getting you the updated LMO. As I mentioned this morning, we have been dealing with some very serious production issues out at the mines which has caused us to lay off most of our staff as of last week. We hope this measure is just temporary and we can reopen the mines within the next few months. Because we are now spread very thin with just 4 employees remaining out at the mines, getting some of the information necessary to do the update will be challenging. I plan to do most of the work myself but will need some of the items done on site by Bobby Watson.

I am basing the work that needs to be done on the map you sent me and can give you an estimated completion date of February 25<sup>th</sup>. I think I will need about 2 weeks for Bobby to get all the GPS and mapping done with him fitting it in where he can. I will simultaneously be working on the written portion of the documents and expect that should take about 2 - 3 weeks.

Please let me know if this is something you can accept.

Sincerely,

Catherine Ziegler
